June 2020

Delaware Department of Education
401 Federal St., Suite 2
Dover, DE 19901

Dear Families,

Enclosed is valuable information about your child's SAT score report. SAT is one measure to determine your child's proficiency in English language arts/literacy and mathematics. This academic checkup is based on the state's yearly tests, which are given in the spring. This test is one measure for determining how prepared one is for high school graduation and beyond; others include grades, classroom assignments, district-wide tests and more.

Delaware's goal is for all students to make progress in each grade so they graduate from high school ready to succeed in college, career, and life. The term "assessment" in education refers to any check of student performance – from in-class quizzes to end-of-year tests. Regular assessments let students, teachers and families know if a student is doing well in a subject or needs extra support. Teachers then use this information to tailor each student's instruction.

Delaware has rigorous academic standards - or learning goals - for what students should know and be able to do at each grade level. Teachers use these standards to help guide their teaching. To measure how well students in Grade 11 are mastering the English language arts/literacy and mathematics standards, the state uses the SAT Assessment. This test goes beyond multiple-choice to include student-constructed responses, writing, problem solving and critical thinking to more accurately measure student progress.

Please read this report carefully and talk to your child's teachers about how you can support your child's continued learning.

Sincerely,

Susan S. Bunting, Ed.D.
Secretary of Education

Am I on Track for College?
 Look for the green, yellow, or red symbols next to your section scores. They let you know if your scores are at or above the benchmark scores. Benchmarks show college readiness. If you see green, you're on track to be ready for college when you graduate.
 If you score below the benchmark, you can use the feedback and tips in your online report to get back on track.

Benchmark scores:
 Evidence-Based Reading and Writing: 470
 Math: 530

How Do My Scores Compare?
 A percentile shows how you scored, compared to other students. It's a number between 1 and 99 and represents the percentage of students whose scores are equal to or below yours.
 For example, if your Math percentile is 57, that means 57% of test takers have Math scores equal to or below yours.
 The Nationally Representative Sample Percentile compares your score to the scores of typical U.S. students.
 SAT® User Percentile compares your score to the scores of students who typically take the test.

How Can I Improve?
 To see which skills are your strongest and what you can do to boost your college readiness, go to your full report online and look for Skills Insight™.

What Are Score Ranges?
 Test scores are single snapshots in time—if you took the SAT once a week for a month, your scores would vary. That's why score ranges are better representations of your true ability. They show how much your score can change with repeated testing, even if your skill level remains the same.
 Colleges know this, and they get score ranges along with scores so they can consider scores in context.
 Your online score report shows your score ranges.

HOW YOUR CHILD DID:

The SAT as It Relates to Delaware Achievement Levels

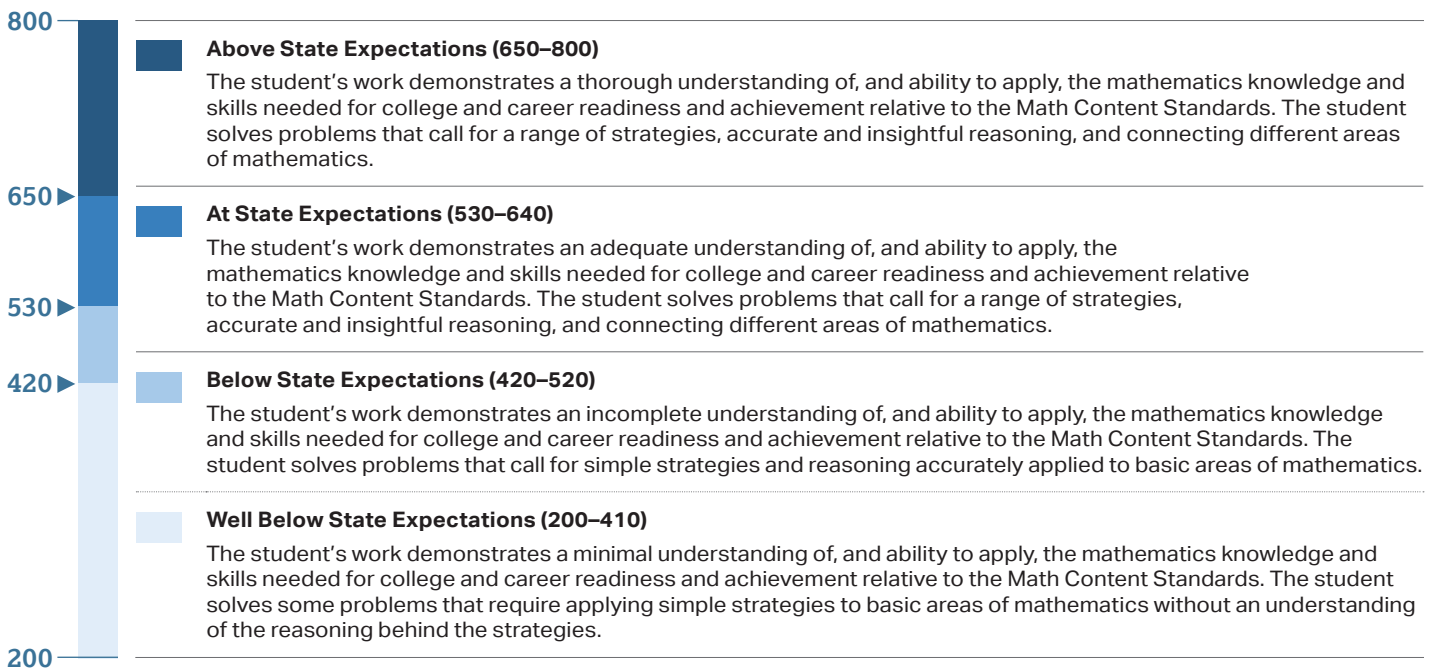

When your child was in elementary and middle schools, you received a score on a four-point scale to let you know how your child performed on the state assessment. While a score of 1 or 2 indicated your child was not performing at grade level, a score of 3 was considered proficient. A score of 4 was considered advanced. Likewise, now that the SAT is serving as the state's high school accountability test, your child's score translates into a performance-level score of 1 to 4 on both the Evidence-Based Reading and Writing (ERW) and Mathematics Tests.

On the SAT Score Report attached to this letter, you can find your child's SAT Evidence-Based Reading and Writing (ERW) and Math Section Scores. Use these Section Scores to determine your child's performance-level scores below.

Grade 11: Evidence-Based Reading and Writing Section Score on the SAT

Grade 11: Math Section Score on the SAT

Grade 11: Essay Score on the SAT

The Essay is scored on three dimensions each 0-8 points. To be proficient, each dimension must be at least 3 points, and the sum of the sub-scores must be 13 or greater.

Non-Proficient	Proficient
0-12	13-24
